Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner contacted Applicants' representative to suggest that the above claims be further defined to include LEFT OUTER JOIN (instead of just outer join) and add language to indicate that the test queries are redefined as part of a larger query. Also, all method claims should recite a "computer-implemented" method to ascertain that the claimed limitations are tied to a technological art. Applicants' representative agreed to do so and he authorized the Examiner to make the above changes via an Examiner's Amendment.
